

Lutron® roller shade fabrics | The Gallery Collection™

 **LUTRON**®

The Gallery Collection™

Vector R - White fabric featured on the cover with a half-wrap anodized aluminum bottom bar

“Style is the perfection of a point of view.”

Richard Eberhart

Style meets technology

Lutron® proudly introduces a new line of designer fabrics that combines style with precision control of daylight. The Gallery Collection™ offers a variety of color, texture, and pattern to accent any décor.

The collection is comprised of three families — burnout, texture, and dim-out fabrics. Enjoy the convenience and precision of Lutron Sivoia® shades with the beauty of The Gallery Collection. Relax knowing that the fabrics are sustainable in order to protect your health and the environment.

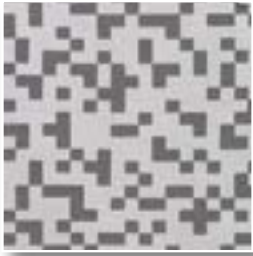

Reflect your lifestyle, control daylight, and enjoy style and comfort.

Burnout fabrics

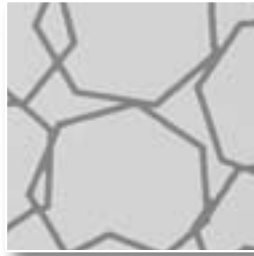

Add mystery and drama using a burnout pattern that obscures and reveals all at the same time. Fiber-etching removes part of the fabric to create the design. Select from a collection of patterns ranging from whimsical to geometric. A new addition to the sheer family, burnouts diffuse light in a distinctive way.

Texture fabrics

Add visual interest and warmth with a texture fabric, a new addition to the sheer family. Whether simple or complex weaves, sheer or linen, these fabrics lend an air of sophistication to any environment. Choose from rich grains or from a variety of neutral-based, softer colors to complement any living space.

Dim-out fabrics

Showcase the stunning interplay of light and shadow with a dim-out fabric that provides the light control you need with the privacy you desire. Select from a saturated palette of lightweight fabrics (Singing in the Rain) to make a bold statement in any room or from an elegant suede collection (Montana).

*Montana fabric allows transmittance of light. Shapes and shadows will be visible.

Fabric rules

Maximum heights

All fabrics have a maximum height limit of 156 in. (3962 mm) with the exception of Singing in the Rain, which has a maximum height limit of 120 in. (3048 mm).

Railroading/Welding

Fabrics in this collection can be railroaded up to twice their usable roll width. Contact customer service for exact measurements.

Montana dim-out fabric is the only fabric that can be welded.

Bottom bar options

All shades made from this collection are available with architectural bottom bars only. The bottom bars may be exposed (pages 4 and 8) or half-wrap (cover and page 6).

Solar properties

A complete listing of solar properties will be available October 2008 at www.lutron.com/fabrics.

Openness factors

A complete listing of openness factors will be available October 2008 at www.lutron.com/fabrics.

Fire ratings

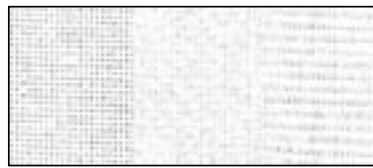

The following fabrics are fire retardant according to US Standard NFPA-701: Montana, Pixel R, and Vector R. All others are not currently rated.

Lead time

Completed shades from The Gallery Collection™ are available for shipping within 20 business days of order receipt.

Pattern rules

The following shade fabrics exhibit a repeating pattern: 3 Weaves, Pixel R, Scratch, Snow Drops, Thin Line Floral, Tokyo, Vector R. Pattern matching will be centered on the shade left to right and vertical repeat patterns will be applied to each shade as the fabric comes off the roll. Please visit www.lutron.com/fabrics for complete details.

Lutron® technology

The technology behind the experience is the Sivoia® Quiet Electronic Drive. Hidden inside each shade roller tube is a patented intelligent drive offering a number of features that translate to ease of operation, reliability, and elegance.

Features:

- Ultra-quiet operation (44dBA)
- Symmetrical light gaps
- Intelligent bottom bar alignment
- 8-year warranty

Sivoia Quiet Electronic Drive

Resources

The following resources are available

- Memo samples – all requests will be processed within 48 to 72 hours
- For more information on how this collection and other Lutron fabrics are sustainable, refer to the Sustainable Fabrics 2008 brochure (P/N 367-1529)
- Visit www.lutron.com/shadingsolutions to view fabrics, specifications, and promotional material, or call Customer Service at 1.800.446.1503
- All fabrics are currently available in the September 2008 SCT release
- A fabric binder for this collection will be available to order November 2008

Refer to our website, www.lutron.com/fabrics, to learn more on specifying these fabrics.
